Summary

During my PhD, I have proposed deep learning based, fast, data-driven solutions to inverse problems like compressive image and light-field reconstructions as well as novel solutions to reconstruction-free computer vision from computational imagers. During my internship stints, I have worked on action detection in videos using bi-directional LSTMs and weakly supervised problems like joint localization of multiple concepts like action, object and person. I was one of the 30 graduating students selected to participate at the **CVPR 2017** Doctoral Consortium, and have won the best paper award at **CVPR CCD workshop 2015**. A track record of mentoring masters and PhD students for the past 5 years, and have been involved in writing grants during my PhD. During my PhD, I have played key roles in successful cross-university collaborations with labs from CMU, Cornell University, University of Arizona and University of Maryland. Currently, I am working on image generation and object segmentation using generative adversarial networks (GANs).

Employment

Post-doctoral Researcher at Carnegie Mellon University, Pittsburgh (August 2017- present)
Advisor: Aswin Sankaranarayanan

Education

- **PhD** in Electrical Engineering with Arts, Media and Engg. (AME) concentration (Fall 2012 - Summer 2017)
Arizona State University, Tempe
- **Master of Science** in Electrical Engineering with Signal Processing and Communication as specialization (Fall 2010 - Summer 2012)
Arizona State University, Tempe
- **Bachelor of Technology** in Electrical and Electronics Engg. (2005-2009)
National Institute of Technology Karnataka, Surathkal, India.

Publications, Book Chapters and Patents

Mentoring Experience

I have mentored the following masters and PhD students.

- Suhas Lohit - His master’s thesis work was awarded the ‘**Best Paper Award**’ at **4th IEEE Workshop on Computational Cameras and Displays (CCD)**, held in conjunction with CVPR 2015. Currently, PhD student at ASU.
- Mayank Gupta - His master’s thesis work on compressive light-field reconstruction using deep learning was presented at the CVPR 2017 CCD workshop. Currently at Meta Co, San Mateo, CA
- Li-Chi Huang - His master’s thesis work on compressive-VQA was accepted at ICIP 2018. Currently at Graftek Imaging.
- Tejas Gokhale at CMU, currently PhD student at ASU.

Prior Work Experience

- **Research Intern** at Mitsubishi Electric Research Labs (MERL), Cambridge, MA (May-Sep 2016). Action detection in videos using computationally efficient contour image features and multi-scale, bi-directional LSTMs. A patent application based on this work has been filed. Host: Mike Jones
- **Research Intern** at Xerox Research Centre India, Bengaluru, India (May-Aug 2015). Worked on joint spatio-temporal localization of multiple concepts like ($\{\text{object}, \text{action}\}, \{\text{subject}, \text{action}\}$) in weakly-labeled youtube videos, leading to a paper at ECCV 2016 (P4).
- **Research Intern** at Bausch & Lomb, Rochester, NY (May-Aug 2013). Applied image processing techniques for segmentation of OCT images of contact lens.
- **Project Assistant:** Dept. of Instrumentation Engg and Applied Physics, Indian Institute of Science, (July 2009- March 2010)
- **Summer Intern:** Dept. of Electrical Engg., Indian Institute of Science, (May 2008-June 2008). Applied shape-context feature descriptor for online hand-writing recognition of two South-Indian languages, Kannada and Tamil.
